

BUSINESS TECHNOLOGY CASE STUDY

NUVU PROPERTY MANAGEMENT

INDUSTRY: Property Management

LOCATIONS: North Idaho

THE SITUATION

Nuvu Property Management needed a more reliable and secure approach to managing both technology and physical security across multiple apartment communities.

- Limited internal IT resources made it difficult to keep systems running smoothly
- Gaps in physical security across parking lots and entry points reduced visibility
- Lack of centralized user management created inefficiencies and risk
- Increasing need for stronger, consistent cybersecurity protections

“ THE CLIENTS WORDS

I have worked with Intechtel on multiple projects and they are quick to respond, easy to work with and do a thorough and complete job. I couldn't recommend them more and am thankful to have a quality company to work with that is local and responsive!

Kristen A.
Business Owner

HOW DID WE HELP?

Intechtel stepped in to modernize IT and security across all properties with a streamlined, scalable approach, including:

- Implemented **Managed IT Support** with proactive monitoring, support, and fast response times
- Deployed **Managed Cybersecurity** including firewalls and network protections to safeguard sensitive data
- Installed **Enterprise-Level Security Camera Systems** to improve visibility across parking areas and entry points
- Upgraded **Data Cabling & Infrastructure** to ensure reliable, efficient system performance

Our ongoing partnership ensures their systems stay secure, supported, and aligned with day-to-day operations.
